Opportunities for Growth

1. Effective materials space that considers safety and cost
2. Need more effective links between design with content to improve student learning
3. Need to consider unit length
4. Specify instruction
5. Need to lead to successful student learning (science content)
6. Needs to incorporate learning of science skills
7. Needs to address attendance issues in group learning
8. Needs to incorporate effective assessment of student learning
9. Need to have a good unit idea with a meaningful product
